

## **OPA's methadone drug information line**

The Ontario Pharmacists' Association's methadone drug information line gives pharmacists and physicians access to drug information experts who can answer their questions about methadone in the treatment of addiction.

**Phone: 1-888-519-6069**

**Hours: Monday - Friday  
9 a.m. - 5 p.m.**

The service is free for methadone dispensers and prescribers.

The drug information pharmacists who answer the line have access to all of the references available to OPA's Drug Information and Research Centre, and they're able to provide support on a wide range of issues - from questions about side effects and the use of methadone during pregnancy to clarifications about storage of the stock solution and drug interactions.

The methadone drug information line is funded by the Ministry of Health and Long-Term Care.
